Message From The Director

We are busy working on our 2020 Summer Camp Program. A variety of camps will be held throughout June and July for rising first through rising sixth grade students. In its seventh year, the nationally-recognized Camp Invention® will be offered in July. Additional information about this year’s Camp Invention® can be found within this newsletter. It promises to be a fantastic week of excitement and innovation. We will, once again, partner with Emanuel Arts Center to offer two amazing art camps. More detailed camp information will follow in our April newsletter, and summer camp flyers will be distributed to local students in late April. If you have questions regarding our camp program, feel free to contact the center.

We hope you’ll make plans to be a part of the summer fun!
2020 CAMP INVENTION PROGRAM ANNOUNCED

We are so excited about this year’s camp! In the 2020 program, ELEVATED, campers will explore the principles of flight, design their own sports facilities and protect ecosystems. At the end of the program, each camper will take home a robot!

The modules for ELEVATED include:

• Camp Invention Flight Lab™:
  Imagination soar as children learn about flight with gliders, rockets, helicopters and hand-copters. They build a cityscape from upcycled materials, navigate planes through a storm and take apart a robot.

• Design Thinking Project™:
  Campers learn the value of their creativity as they bring their biggest ideas to life. To become successful innovators, they create sketches, build prototypes, design logos and find out how to pitch their invention while protecting their intellectual property.

• Rescue Squad™:
  Using teamwork and problem-solving skills, children protect the Earth’s ecosystems. Inspiring activities include creating pods to compete in zipline races, exploring energy conservation, eliminating pollution and helping wildlife in habitats across the country.

• Camp Invention Champions™:
  As they discover the unseen inventors behind their favorite sports, campers apply their own ingenuity. They trade inventor playing cards, create and play their own high-energy hover-ball games, and design and build the ultimate sports complex.

As they discover the unseen inventors behind their favorite sports, campers apply their own ingenuity. They trade inventor playing cards, create and play their own high-energy hover-ball games, and design and build the ultimate sports complex.

Camp Invention® is the only nationally recognized summer program focused on creativity, innovation, real-world problem solving and the spirit of invention. Through hands-on instruction, our Camp Invention® program encourages children third through sixth grade to explore science, technology, engineering and mathematics curriculum inspired by some of the world’s greatest inventors. Camp Invention® is a program of the National Inventors Hall of Fame. Contact the Center for more information about this summer’s program.

FULFORD CENTER TO CELEBRATE 10TH ANNIVERSARY

The Fulford Center is celebrating double-digit success in 2020, marking its 10th anniversary. Please join us in a celebration of this accomplishment. The event will take place on April 30 from 10:00 a.m. until 11:30 a.m. with a short program beginning at 10:30 a.m.

Since opening its doors in 2010, the Fulford Center has experienced tremendous growth and accomplishment, and we thank you for helping us make the past ten years so successful!

We look forward to seeing you on April 30 for this milestone anniversary celebration!

To schedule an event or a planetarium visitation, give us a call at 289-2464. Our classroom can accommodate up to seventy people, and we have first class catering. We currently have fourteen planetarium shows to educate, entertain, and amaze all ages.
