Mainly related to Title IX issues

2-Hobart and William Smith Colleges

A Culture of Respect is one in which empathy, diversity and truth are valued and practiced.

A culture of respect is one that encourages us to see the world from multiple perspectives; to participate in dialogue that lifts understanding and that cultivates a practice of listening; to understand marginalization and isolation as the byproduct of prejudice and hate; to show leadership and intervene even when it is inconvenient and especially when it is difficult; and to fight oppression while we also guard against intolerance in our own thoughts and actions.
